

GET STARTED

EN

1. Connect the webcam to a free USB port on your computer and place the camera on your monitor using the universal mounting clip. The webcam's vertical angle can be adjusted as desired.
2. Make sure to choose the video and audio settings "USB Camera" and "USB Audio" when using the webcam with your communication apps.

DE

1. Verbinden Sie die Webcam mit einem freien USB-Anschluss Ihres Computers und platzieren Sie die Kamera mit Hilfe des universellen Befestigungsclips auf Ihrem Monitor. Der vertikale Winkel der Webcam kann nach Belieben angepasst werden.
2. Stellen Sie sicher, dass die Video- und Audioeinstellungen „USB Camera“ und „USB Audio“ ausgewählt sind, wenn Sie die Webcam mit Ihren Kommunikations-Apps verwenden.

USO CONFORME ALLA DESTINAZIONE
Questo prodotto è destinato ad essere utilizzato come una webcam USB per il collegamento a un computer per uso domestico o in ufficio, in spazi asciutti e chiusi. Il prodotto non richiede manutenzione. Non aprire o usare in caso di danneggiamenti. La Speedlink GmbH non risponde di danni al prodotto o lesioni personali a seguito di un uso negligente, improprio o non conforme all'uso indicato.

Speedlink заявляет, что изделие отвечает требованиям, содержащимся в разделе «Conformity notice».

ИСПОЛЬЗОВАНИЕ ПО НАЗНАЧЕНИЮ

Данное изделие используется в качестве веб-камеры для подключения по USB к домашнему или офисному компьютеру в сухих закрытых помещениях. Оно не нуждается в техническом обслуживании. Не открывать и не использовать, если оно повреждено. Speedlink GmbH не несет ответственности за ущерб изделию или травмы лиц вследствие неосторожного, ненадлежащего, или не соответствующего указанной цели использования.

Speedlink declara que el producto cumple con los requisitos enumerados en „Conformity Notice“.

- WEEE: Entregar el dispositivo en el punto limpio. No depositar en contenedores de basura doméstica. El almacenamiento/eliminación inadecuada puede causar daños al medio ambiente y/o a la salud humana.

Speedlink declara que el producto cumple con los requisitos enumerados en „Conformity Notice“.

Este producto es una webcam que se conecta al ordenador a través de una conexión USB. Destinada a su uso en casa o en la oficina, siempre en espacios secos y cerrados. No necesita mantenimiento. No abrir ni utilizar si presenta daños o defectos. Speedlink GmbH no asume la responsabilidad por daños en el producto o lesiones corporales ocasionadas por una utilización inadecuada o impropia, diferente de la recomendada.

POUŽÍVANIE NA URČENÝ ÚČEL

Tento výrobok slúži ako webkamera na pripojenie k počítaču, a na domáce alebo kancelárske použitie v suchých, uzatvorených priestoroch. Nevyžaduje údržbu. Neotvárajte ani pro poškodení nepoužívajte. Spoločnosť Speedlink GmbH nepreberá žiadne

ručenie za škody na produktoch alebo poranenia osôb v dôsledku neopatrného, neodborného používania alebo používania nezodpovedajúceho uvedenému účelu.

Túto informáciu uchovajte, prosím, pre budúce použitie.

SAFETY INSTRUCTIONS

IMPORTANT SAFETY INSTRUCTIONS

 Please note that the failure to observe these instructions can cause product damage, explosion, fire and/or electric shocks!

• Only use the devices as indicated in the user guide. Do not open or repair them.

• Do not expose the devices to liquids, heat or cold.

• Do not use the devices in a damp environment. Clean the device with a dry cloth.

• Keep the devices and all loose parts away from children, pets and unauthorized persons.

• Only use the devices with the appropriate provided accessories/cables.

• Disconnect cables from the devices if they will not be used for a long time. When disconnecting the cables, don't pull on the cord but on the plug.

• Don't use the cables in any way other than mentioned in the user guide; don't bend, cut, extend, knot or step on them.

• Do not insert any foreign objects into the openings of the device.

• If the devices are damaged in any way or get too hot, stop using them immediately.

• Take caution when using devices that emit radio signals if you have a pacemaker or are dependent on other sensitive electronic life aids.

Safety instructions in further languages: www.speedlink.com.

WICHTIGE SICHERHEITSHINWEISE

 Die Nichtbeachtung dieser Hinweise kann zu Schäden am Produkt, Explosionen, Feuer oder elektrischen Schocks führen!

• Produkte nur entsprechend der Gebrauchsanleitung verwenden. Nicht öffnen oder reparieren.

• Produkte keinen Flüssigkeiten, Hitze oder Kälte aussetzen.

• Produkte nicht in einer feuchten Umgebung nutzen. Mit einem trockenen Tuch reinigen.

• Produkte und alle losen Teile von Kindern, Haustieren und unbefugten Personen fernhalten.

• Produkte nur mit dem mitgelieferten Zubehör nutzen/aufladen.

• Kabel von Produkten abziehen, wenn sie längere Zeit nicht verwendet werden. Beim Abziehen nicht am Kabel, sondern am Stecker ziehen.

• Kabel nur gemäß Gebrauchsanleitung verwenden; nicht knicken, verlängern oder verknoten; nicht einschneiden oder darauf treten.

• Keine fremden Objekte in die Öffnungen von Produkten einführen.

• Bei Beschädigung oder Überhitzung der Produkte sofort die Benutzung abbrechen.

• Vorsicht bei Abhängigkeit von Herzschrittmachern oder anderen empfindlichen elektronischen Lebenshilfen, wenn Produkte Funksignale aussenden.

Sicherheitshinweise in weiteren Sprachen: www.speedlink.com.

WARNING SYMBOLS AND MARKINGS

Extended use of input devices may cause health problems such as discomfort or pain; as such, take regular breaks and consult a doctor if problems persist.

 Bei extrem langer Benutzung von Eingabegeräten kann es zu gesundheitlichen Beschwerden wie Unbehagen oder Schmerzen kommen. Legen Sie regelmäßig Pausen ein und holen Sie bei wiederkehrenden Problemen ärztlichen Rat ein.

Conformity notice in further languages: www.speedlink.com

KONFORMITÄTSHINWEIS Unter Einwirkung von starken statischen, elektrischen oder hochfrequenten Feldern (Funkanlagen, Mobiltelefone, Mikrowellen, elektrostatische Entladungen) kann es zu Funktionsbeeinträchtigungen des Gerätes (der Geräte) kommen. Operation of the device (the devices) may be affected by strong static, electrical or high-frequency fields (radio installations, mobile telephones, microwaves, electrostatic discharges). If this occurs, try increasing the distance from the devices causing the interference.

Operation of the device (the devices) may be affected by strong static, electrical or high-frequency fields (radio installations, mobile telephones, microwaves, electrostatic discharges). If this occurs, try increasing the distance from the devices causing the interference.

Operation of the device (the devices) may be affected by strong static, electrical or high-frequency fields (radio installations, mobile telephones, microwaves, electrostatic discharges). If this occurs, try increasing the distance from the devices causing the interference.

Operation of the device (the devices) may be affected by strong static, electrical or high-frequency fields (radio installations, mobile telephones, microwaves, electrostatic discharges). If this occurs, try increasing the distance from the devices causing the interference.

Operation of the device (the devices) may be affected by strong static, electrical or high-frequency fields (radio installations, mobile telephones, microwaves, electrostatic discharges). If this occurs, try increasing the distance from the devices causing the interference.

Operation of the device (the devices) may be affected by strong static, electrical or high-frequency fields (radio installations, mobile telephones, microwaves, electrostatic discharges). If this occurs, try increasing the distance from the devices causing the interference.

Operation of the device (the devices) may be affected by strong static, electrical or high-frequency fields (radio installations, mobile telephones, microwaves, electrostatic discharges). If this occurs, try increasing the distance from the devices causing the interference.

Operation of the device (the devices) may be affected by strong static, electrical or high-frequency fields (radio installations, mobile telephones, microwaves, electrostatic discharges). If this occurs, try increasing the distance from the devices causing the interference.

Operation of the device (the devices) may be affected by strong static, electrical or high-frequency fields (radio installations, mobile telephones, microwaves, electrostatic discharges). If this occurs, try increasing the distance from the devices causing the interference.

Operation of the device (the devices) may be affected by strong static, electrical or high-frequency fields (radio installations, mobile telephones, microwaves, electrostatic discharges). If this occurs, try increasing the distance from the devices causing the interference.

Operation of the device (the devices) may be affected by strong static, electrical or high-frequency fields (radio installations, mobile telephones, microwaves, electrostatic discharges). If this occurs, try increasing the distance from the devices causing the interference.

Operation of the device (the devices) may be affected by strong static, electrical or high-frequency fields (radio installations, mobile telephones, microwaves, electrostatic discharges). If this occurs, try increasing the distance from the devices causing the interference.

Operation of the device (the devices) may be affected by strong static, electrical or high-frequency fields (radio installations, mobile telephones, microwaves, electrostatic discharges). If this occurs, try increasing the distance from the devices causing the interference.

Operation of the device (the devices) may be affected by strong static, electrical or high-frequency fields (radio installations, mobile telephones, microwaves, electrostatic discharges). If this occurs, try increasing the distance from the devices causing the interference.

Operation of the device (the devices) may be affected by strong static, electrical or high-frequency fields (radio installations, mobile telephones, microwaves, electrostatic discharges). If this occurs, try increasing the distance from the devices causing the interference.

Operation of the device (the devices) may be affected by strong static, electrical or high-frequency fields (radio installations, mobile telephones, microwaves, electrostatic discharges). If this occurs, try increasing the distance from the devices causing the interference.

Operation of the device (the devices) may be affected by strong static, electrical or high-frequency fields (radio installations, mobile telephones, microwaves, electrostatic discharges). If this occurs, try increasing the distance from the devices causing the interference.

Operation of the device (the devices) may be affected by strong static, electrical or high-frequency fields (radio installations, mobile telephones, microwaves, electrostatic discharges). If this occurs, try increasing the distance from the devices causing the interference.

Operation of the device (the devices) may be affected by strong static, electrical or high-frequency fields (radio installations, mobile telephones, microwaves, electrostatic discharges). If this occurs, try increasing the distance from the devices causing the interference.

Operation of the device (the devices) may be affected by strong static, electrical or high-frequency fields (radio installations, mobile telephones, microwaves, electrostatic discharges). If this occurs, try increasing the distance from the devices causing the interference.

Operation of the device (the devices) may be affected by strong static, electrical or high-frequency fields (radio installations, mobile telephones, microwaves, electrostatic discharges). If this occurs, try increasing the distance from the devices causing the interference.

Operation of the device (the devices) may be affected by strong static, electrical or high-frequency fields (radio installations, mobile telephones, microwaves, electrostatic discharges). If this occurs, try increasing the distance from the devices causing the interference.

Operation of the device (the devices) may be affected by strong static, electrical or high-frequency fields (radio installations, mobile telephones, microwaves, electrostatic discharges). If this occurs, try increasing the distance from the devices causing the interference.

Operation of the device (the devices) may be affected by strong static, electrical or high-frequency fields (radio installations, mobile telephones, microwaves, electrostatic discharges). If this occurs, try increasing the distance from the devices causing the interference.

Operation of the device (the devices) may be affected by strong static, electrical or high-frequency fields (radio installations, mobile telephones, microwaves, electrostatic discharges). If this occurs, try increasing the distance from the devices causing the interference.

Operation of the device (the devices) may be affected by strong static, electrical or high-frequency fields (radio installations, mobile telephones, microwaves, electrostatic discharges). If this occurs, try increasing the distance from the devices causing the interference.

Operation of the device (the devices) may be affected by strong static, electrical or high-frequency fields (radio installations, mobile telephones, microwaves, electrostatic discharges). If this occurs, try increasing the distance from the devices causing the interference.

Operation of the device (the devices) may be affected by strong static, electrical or high-frequency fields (radio installations, mobile telephones, microwaves, electrostatic discharges). If this occurs, try increasing the distance from the devices causing the interference.

Operation of the device (the devices) may be affected by strong static, electrical or high-frequency fields (radio installations, mobile telephones, microwaves, electrostatic discharges). If this occurs, try increasing the distance from the devices causing the interference.

Operation of the device (the devices) may be affected by strong static, electrical or high-frequency fields (radio installations, mobile telephones, microwaves, electrostatic discharges). If this occurs, try increasing the distance from the devices causing the interference.

Operation of the device (the devices) may be affected by strong static, electrical or high-frequency fields (radio installations, mobile telephones, microwaves, electrostatic discharges). If this occurs, try increasing the distance from the devices causing the interference.

Operation of the device (the devices) may be affected by strong static, electrical or high-frequency fields (radio installations, mobile telephones, microwaves, electrostatic discharges). If this occurs, try increasing the distance from the devices causing the interference.

Operation of the device (the devices) may be affected by strong static, electrical or high-frequency fields (radio installations, mobile telephones, microwaves, electrostatic discharges). If this occurs, try increasing the distance from the devices causing the interference.

Operation of the device (the devices) may be affected by strong static, electrical or high-frequency fields (radio installations, mobile telephones, microwaves, electrostatic discharges). If this occurs, try increasing the distance from the devices causing the interference.

Operation of the device (the devices) may be affected by strong static, electrical or high-frequency fields (radio installations, mobile telephones, microwaves, electrostatic discharges). If this occurs, try increasing the distance from the devices causing the interference.

Operation of the device (the devices) may be affected by strong static, electrical or high-frequency fields (radio installations, mobile telephones, microwaves, electrostatic discharges). If this occurs, try increasing the distance from the devices causing the interference.

Operation of the device (the devices) may be affected by strong static, electrical or high-frequency fields (radio installations, mobile telephones, microwaves, electrostatic discharges). If this occurs, try increasing the distance from the devices causing the interference.

Operation of the device (the devices) may be affected by strong static, electrical or high-frequency fields (radio installations, mobile telephones, microwaves, electrostatic discharges). If this occurs, try increasing the distance from the devices causing the interference.

Operation of the device (the devices) may be affected by strong static, electrical or high-frequency fields (radio installations, mobile telephones, microwaves, electrostatic discharges). If this occurs, try increasing the distance from the devices causing the interference.

Operation of the device (the devices) may be affected by strong static, electrical or high-frequency fields (radio installations, mobile telephones, microwaves, electrostatic discharges). If this occurs, try increasing the distance from the devices causing the interference.

Operation of the device (the devices) may be affected by strong static, electrical or high-frequency fields (radio installations, mobile telephones, microwaves, electrostatic discharges). If this occurs, try increasing the distance from the devices causing the interference.

Operation of the device (the devices) may be affected by strong static, electrical or high-frequency fields (radio installations, mobile telephones, microwaves, electrostatic discharges). If this occurs, try increasing the distance from the devices causing the interference.

Operation of the device (the devices) may be affected by strong static, electrical or high-frequency fields (radio installations, mobile telephones, microwaves, electrostatic discharges). If this occurs, try increasing the distance from the devices causing the interference.

Operation of the device (the devices) may be affected by strong static, electrical or high-frequency fields (radio installations, mobile telephones, microwaves, electrostatic discharges). If this occurs, try increasing the distance from the devices causing the interference.

Operation of the device (the devices) may be affected by strong static, electrical or high-frequency fields (radio installations, mobile telephones, microwaves, electrostatic discharges). If this occurs, try increasing the distance from the devices causing the interference.

Operation of the device (the devices) may be affected by strong static, electrical or high-frequency fields (radio installations, mobile telephones, microwaves, electrostatic discharges). If this occurs, try increasing the distance from the devices causing the interference.

Operation of the device (the devices) may be affected by strong static, electrical or high-frequency fields (radio installations, mobile telephones, microwaves, electrostatic discharges). If this occurs, try increasing the distance from the devices causing the interference.

Operation of the device (the devices) may be affected by strong static, electrical or high-frequency fields (radio installations, mobile telephones, microwaves, electrostatic discharges). If this occurs, try increasing the distance from the devices causing the interference.

Operation of the device (the devices) may be affected by strong static, electrical or high-frequency fields (radio installations, mobile telephones, microwaves, electrostatic discharges). If this occurs, try increasing the distance from the devices causing the interference.

Operation of the device (the devices) may be affected by strong static, electrical or high-frequency fields (radio installations, mobile telephones, microwaves, electrostatic discharges). If this occurs, try increasing the distance from the devices causing the interference.

Operation of the device (the devices) may be affected by strong static, electrical or high-frequency fields (radio installations, mobile telephones, microwaves, electrostatic discharges). If this occurs
