METIS USB Stereo Headset, 3.5mm Jack with USB Soundcard, black

The METIS USB stereo headset combines a comfortable wearing experience with modern technology. The headphones are a real lightweight and have a stable headband as well as soft ear cup padding for comfortable work in the home office or office. Thanks to the lively, natural stereo sound, telephone calls and video calls are particularly pleasant. The 2m long cable ensures freedom of movement at the workplace. In addition, the METIS headset has a cable remote control with which the volume can be adjusted and the mute function activated. If required, this can be removed and the headset can also be connected via a 3.5mm connector instead of via USB.
