MANDAS LED Gaming Headset - wireless, black

The MANDAS LED gaming headset offers first-class sound and enormous versatility. Enjoy a unique listening experience, whether you're using a PC, tablet, smartphone or console. 50mm driver units provide you with spectacular surround sound everywhere you go and turn every game and song into an acoustic experience. Thanks to the precise and flexible microphone, communication with your friends and fellow players is always flawless - a real advantage, especially in hectic situations. Depending on the device, the headset can be connected wirelessly or via a 3.5mm jack. It can be operated wirelessly thanks to a USB receiver and is particularly suitable for PCs as well as PS5®, PS4® and Nintendo Switch® consoles. Smartphones, tablets and Xbox One® controllers can be connected via the audio cable supplied. When used wirelessly, the headset has a range of up to ten meters and the 900mAh rechargeable battery guarantees up to ten hours of uninterrupted gaming fun. If your session lasts any longer, the headset can be connected to your device via the audio cable and you can continue to play. The soft ear cups and the flexible headband guarantee the highest level of comfort, even when used hour after hour. With its illuminated ear cups, the MANDAS LED not only impresses acoustically, but aesthetically too.
