PIAVO Ergonomic Deskset - Wireless, black - DE Layout

The PIAVO Ergonomic Desk Set, consisting of a keyboard and mouse, has been designed for healthy and efficient working. Both accessories are ergonomically shaped and promote a natural posture. The burden on the tendons and joints in the arm, shoulder and neck is reduced, significantly minimising physical strain. At the same time, the set stands out through its high level of functionality. Thanks to wireless 2.4 GHz signal technology with a reach of up to ten metres, you can work no matter where your computer is positioned. The precise infra-red sensor on the mouse works on almost all surfaces and the sensor resolution can be adjusted to suit the current situation via a dpi switch. Five mouse buttons allow efficient, comfortable use. The keyboard with full-format key panel features twelve multifunctional buttons to make data entry easy, and always stays put thanks to rubberised feet. The mouse and the keyboard can be switched on and off with a separate button.

Features
