GRAVITY CARBON RGB 2.1 Subwoofer System, black

The GRAVITY CARBON RGB is an active 2.1 speaker system for PC and notebook that will enchant you with colourful worlds of sound: With its wooden housing in a stylish carbon look, it ensures deep bass and an intensive, balanced sound volume, while the RGB lighting for the subwoofer and satellites in 16.7 million colours add a special touch. Among other things, the light effects also adapt to the music and ensure a real disco feeling in your own home. You can connect the GRAVITY CARBON RGB to a multimedia device, smartphone or tablet via an AUX cable or via BLUETOOTH® and thus benefit from a wide range of possible uses. The loudspeaker system can be conveniently controlled via a practical table remote control and the mains switch and automatic standby mode prevent unnecessary power consumption.
