

SL-620000-DOG

SILK Mousepad, Dog & Cat

The SILK mousepad has a silky-soft textile covering which feels really nice to touch, plus it allows your mouse to glide smoothly and silently across its surface. What's more, its fine structure enables optical or laser mice to scan the surface with maximum precision. The high quality material is anti-static, and thanks to the rubberised backing, the really slimline pad will stay rooted to any surface.

Features
