

Healthy and efficient working with the new PIAVO Ergonomic Deskset from Speedlink

Minimises physical strain and convinces with high functionality

Heeslingen/Germany, 03 May 2022 – The new PIAVO Ergonomic Deskset from Speedlink ensures a healthy posture and makes working on PC and notebook easier in the long run. To complete the setup, Speedlink offers other ergonomic products in its range, such as the [SATEEN ergonomic wrist rest](#) and the [VELLU gel mouse pad](#).

Sleek and ergonomic design

The Deskset consists of a keyboard and a mouse and was designed for healthy and efficient working. Both devices are ergonomically shaped and promote a natural posture while working on PC or notebook. This sustainably protects the tendons and joints in the arm, shoulder and neck and considerably minimises physical strain. In addition, the set is characterised by a high level of functionality.

Range of up to ten metres thanks to 2.4 GHz wireless technology

Due to the wireless 2.4 GHz radio technology with a range of up to ten metres, work can be done independently of the computer's position. The precise infrared sensor of the mouse works on almost all surfaces and the sensor resolution can be adjusted to the respective situation with a dpi switch. In addition, the five mouse buttons allow comfortable and efficient control. With a total of twelve multifunction keys, the keyboard with full-size keypad facilitates input options and always maintains the right position thanks to the rubberised feet. Both mouse and keyboard can be switched on and off via a separate switch.

Availability

The [PIAVO Ergonomic Deskset – wireless, black](#) is available now for 59.99 € (RRP).
