## AUDIS PRO Streaming Microphone, black

Successful podcasts and streams stand out through one thing: excellent audio quality. With the AUDIS PRO Desktop Streaming Microphone, you can make sure that your content is always recorded professionally and crystal-clear. The compact condenser microphone with cardioid directionality effectively blocks disruptive background noise while recording what happens in front of the microphone. At the same time, unwanted sounds such as breathing and plosives (P, K, B etc.) are effectively blocked by a foam windscreen and metallic pop filter. Thanks to the shock-absorbent holder and stable tripod, even lively discussions and environments are no problem. At the same time, the practical volume controller on the front of the microphone makes adjusting the sensitivity of your recordings simple and possible at any time. If you want to bring your production to the next level, the AUDIS PRO Desktop Streaming Microphone is exactly what you need.

### Features

- Streaming microphone
- Tripod with shock mount
- Windscreen
- Pop filter
- Plug & play
- Microphone type: 14mm electret condenser
- Frequency: 20Hz-20kHz
- Equivalent noise level: 16dBA max.
- Sampling rate: 176kHz/24bit
- Directional characteristic: cardioid
- Impedance: 1.2kΩ
- Sensitivity: -13.5dBFS (±3dB, 94dB SPL at 1kHz)
- Signal-to-noise ratio: 60dB
- Sound pressure level: max. 110dB
- Connection: USB-A
- Cable length: 1.5m
- Dimensions including tripod: 173 × 170 × 290mm (W × H × D)
- Dimensions of microphone: 47 × 52 × 141mm (W × H × D)
- Weight: 335g

PU: 20 Piece(s)
