

The perfect piece of kit for thrilling, action-packed gaming adventures – with an ultra-cool look. The TYALO Gaming Deskset is the perfect match for your awesome gaming room with its futuristic metallic design and breathtaking mouse and keyboard light effects. The mouse features five ergonomically placed buttons for total game domination, with its two DPI switches enabling you to toggle the sensor between 1,200dpi to 3,200 dpi and fine tune it to suit the on-screen action. Your mouse will glide as fast as lightning across the accompanying mousepad's soft textile surface, enabling the mouse to accurately sense your every reaction. Meanwhile, the keyboard features coded WASD and arrow keys so you always locate the right key even when things get heated in the game – plus it boasts anti-ghosting technology with 19-key rollover. The keyboard's metal frame is stunning and robust, capable of withstanding a hammering while staying rooted to the spot thanks to the non-skid base. It also features an integrated smartphone dock so you can keep an eye on chats, calls or even online walkthroughs... just in case.
