TYRON RGB Gaming Stereo Headset - for PC/PS5/PS4/ Xbox Series X/S/Switch/OLED/Lite , black

The TYRON RGB Stereo Headset is an indispensable addition to any gaming enthusiast's equipment. It bridges the worlds of different gaming platforms, from PC to PS5, PS4, Xbox to Switch, offering universal compatibility. Its multi-colored RGB lighting enriches the atmosphere of any gaming room. Designed to be easy and intuitive to use, the headset has integrated volume and microphone mute controls. The wearing comfort of the TYRON RGB stereo headset is specially optimized for extended gaming sessions. It features a sensitive microphone with a flexible arm and offers adjustable size adjustment. The softly padded headband and the gently enclosing ear cups ensure an almost weightless wearing experience. The omnidirectional orientation of the microphone ensures that the voice is transmitted clearly and clearly. This is crucial for effective communication in the game, be it strategic agreements or celebrating victories together.

The included Y adapter allows connection via a single 3.5mm port as well as to devices with two 3.5mm ports and makes the headset a true all-rounder in any gaming configuration.
