The jewel in the gaming crown – Speedlink’s RETICOS RGB mouse conjures up a mousepad light show

Weertzen, 5 March 2019: The gaming accessories specialist Speedlink launches the RETICOS – a spectacular RGB gaming mouse with a stunning diamond line design.

Glowing veins criss-cross the mysterious black shape like the edges of a sparkling jewel, while the mysterious pulsating light at its core illuminates the distinctive wedge shape. But don’t worry! It just wants to play. The RETICOS’ distinctive shape and stunning diamond line design make this RGB mouse the jewel of any mousepad. Download the software and have the mouse illuminate in 16.7 million different colours, including a range of effects. The RETICOS doesn’t only have jaw-dropping looks – it’s also packed with cutting-edge technology. Its six ergonomically placed, easy access buttons are a breeze to remap or assign macros to – such as for casting primary spells or unleashing primary skills with deadly accuracy. Every movement of the mouse is also captured with pin-point accuracy thanks to the high-end Pixart 3325 gaming sensor which boasts a resolution of up to 10,000dpi.

“We develop products for really different target groups, and we know that gamers in particular have the guts to go for far out, eye-catching designs. This is why we went for the innovative, space-age diamond line design for the RETICOS – a decision that is also new for us,” explained Rainer Nawratil, Director of Product Management, PR & Marketing at Speedlink. “In terms of tech, with the RETICOS we’re building on the experiences gained from our existing tried-and-tested gaming lineup and offering unparalleled performance once again.”
