Speedlink's LITIKO office mouse cuts the cord and offers exceptional ergonomic comfort

Weertzen, 5 December 2019 – Speedlink presents its new wireless office mouse with an ergonomically optimised design: the LITIKO.

Ergonomic, wireless, stylish – with its LITIKO mouse, Speedlink offers a practical and sculpted way to bring comfort to the desktop that reduces wrist strain and prevents hand numbness. The LITIKO is optimised for right-handers, fitting the palm perfectly with its 45° sloping-side design. This stunning shape promotes a natural hand posture, with its rubberised non-slip finish and triangular-pattern zones providing extra grip for a secure hold. Another unique feature is the scroll wheel positioned on the left-hand side of the mouse. This allows easy scrolling using the thumb, taking the strain off the index finger and relieving it from all that usual heavy-duty scrolling.

Equipped with five buttons and a DPI switch, the LITIKO is much more versatile than most other office mice. The additional buttons make life easier as more functions can be performed directly using the mouse, and thanks to the DPI switch it's quick and easy to toggle between dpi levels (1,000, 1,600 and 2,400dpi). The LITIKO also boasts whisper-quiet left and right buttons, so colleagues sitting at nearby desks won't be driven to despair by the frequent sound of clicking. And with its 8m wireless range, the mouse is also perfect for use away from the desktop such as in conference rooms and elsewhere.

The LITIKO is a great addition to Speedlink's ergonomic lineup. Just like the BRAICE wrist rest, the ergonomically optimised mice such as the LITIKO and PIAVO as well as the APTICO trackball mouse relieve pressure on the wrist and tendons when using the computer, taking the strain out of the everyday.
