Protection is in the bag for laptops and the like thanks to Speedlink

Weertzen, 7 February 2019: Computer accessories specialist Speedlink has added a new padded bag to its lineup for the safe and secure transportation of a laptop, documents and accessories – the MAGNO.

Everyone's experienced that sinking feeling of pulling their precious laptop out of their rucksack only to see it sporting shiny new scratches, dents or other marks after carelessly chucking it in and carrying it around all day long.

Put a stop to this with Speedlink's new MAGNO padded laptop bag, which is available in two sizes.

It offers all the protection needed to store and transport a notebook and documents as well as a smartphone, pens and the like safely and securely thanks to its split-section main compartment, generously sized accessory compartment with a range of pockets and holders, plus a small storage compartment for keys and other little essentials – and it delivers all this at an inexpensive starting price of just €27.99. The MAGNO offers a range of carrying options: use the two carry handles, the shoulder strap or even let the trolley bag take the strain thanks to the practical trolley belt – making it the king of carry on bags.

"Everyday life is unimaginable without notebooks and tablets. As such, we thought it would be a good idea to also turn to the question of storage and transportation, and develop a laptop bag that meets these needs. With the MAGNO, we've designed a high-quality, stylish bag that gives its precious contents the best protection against damage," explained Peter Heller, Product Manager at Speedlink.
