

Quiet, inexpensive, small: Speedlink's BEENIE mini mouse offers top quality for use on the move

Weertzen, 10 November 2017: With its virtually silent buttons, with its BEENIE Mobile Mouse the electronics specialist Speedlink is once again showcasing its expertise for high-quality, stylish office products that offer incredible value for money.

The BEENIE marks a continuation of Speedlink's success story with compact mice for use on the move. This 3-button mouse comes in a USB or wireless version and is available in a choice of two colours: red or black.

Its virtually silent buttons make it perfect for use while on the move, such as when using a laptop in the train. And for even greater convenience, its ergonomic shape and retractable cable prevent cable tangle in the laptop bag.

It boasts an accurate 1,200dpi optical sensor and uses hardly any power – particularly important for the wireless version. It's quick and easy to install without any additional drivers. Despite its attractive price of €7.99 (RRP) for the USB mouse and €12.99 (RRP) for the wireless version, the BEENIE is incredibly rugged and equipped with the latest generation optical HQ sensor. "The BEENIE is perfect for anyone who works a lot on the move and who doesn't want to forgo the comfort and convenience of a premium mouse. Weighing in at just over 40g, and thanks to its compactness, it really will fit in any bag", explained Speedlink Product Manager Rainer Nawratil summing up.

The BEENIE will be available from stores and online retailers from December 2017.
