## **Fully charged gaming experience and smartphone with Speedlink's wireless charging gaming mousepad**

**Weertzen, 13 February 2020 – Speedlink presents the ENMATE – an illuminated gaming mousepad with a large gliding surface plus a smartphone zone.**

The only thing that counts in the game is the on-screen action – it's where you win (or lose), create (or destroy) worlds, and above all where you escape the everyday grind to enjoy yourself. To immerse yourself fully in the game, your commands need to be translated with pin-point precision – a task the ENMATE accomplishes with ease thanks to its ultra-smooth micro-texture surface which has been optimised for super-fast high- and low-sense mouse manoeuvres and optimal control to send opponents packing. And to take the immersive experience to the max, the ENMATE can be customised to light up in a colour that creates the perfect mood on the desktop.

Sometimes it's impossible to avoid everyday life coming a-knocking with an important message or call, so having the smartphone within eyeshot is critical. The ENMATE makes it a breeze to deal with such distractions with its special smartphone zone – which is not only perfectly positioned for keeping an eye on the smartphone, but also keeps it topped up with power. The mousepad features a built-in wireless charger for fast and convenient charging of compatible smartphones, banishing the hassle of searching for a power outlet and hooking up the power cable. Simply place it on the pad and it gets powered up, letting you return your focus to the all-important on-screen action.
