Take your seat for an explosion of light on Speedlink's new gaming chair with unparalleled RGB illumination

Weertzen, 16 March 2020 – Speedlink presents its ZAPHYRE gaming chair with customisable LED light strips.

Every successful mission hinges on having the right kit, but a PC, input devices and headset aren't the be-all and end-all. With Speedlink's new ZAPHYRE RGB Gaming Chair, gamers now have the ultimate throne for their exclusive gaming command centre. Its super-comfortable, height-adjustable neck- and spine-support pillows help gamers maintain an upright position and full alertness for every waking mission-critical moment – and once they've emerged victorious, gamers can recline all the way back to a horizontal position to relax and recharge ready for the next campaign. The ZAPHYRE is also a stunning addition to the command centre with its extra-wide LED strips. They light up the gaming throne in any of 16.7 million RGB colours, plus gamers can customise the effects by toggling between the ZAPHYRE's 300 different colourful illumination modes using the remote control. The light strips are powered by a high-capacity 5,000mAh powerbank that stows away discreetly in the back of the chair. This hidden bundle of firepower packs so much punch that it will keep gamers bathed in atmospheric lighting for hour after hour – just in case the mission demands that the positive lighting vibe keeps going for just that little longer.
