Starship touches down on the desktop – Speedlink’s TYALO deskset is straight out of the future

Weertzen, 21 March 2019: The gaming accessories specialist Speedlink presents the TYALO – an illuminated gaming deskset with a futuristic, space-age design. It comprises a matching keyboard, mouse and mousepad all working in cosmic harmony.

The virtual battle against the forces of evil (or good for that matter) can only be won with allies – all the better if they come from the future. This is precisely where Speedlink’s TYALO deskset looks like it comes from, with this keyboard, mouse and mousepad combo boasting a space-age design, futuristic metal elements and stunning light effects. This all-rounder gaming deskset will help gamers face any challenge from any timeline: whether in dark dungeons, during medieval sieges or in futuristic battles. The mouse’s five ergonomically placed, easy access buttons and the sturdy metal keyboard’s colour-coded WASD and arrow keys give gamers the decisive advantage when all hell is breaking loose around them. And that’s not all – the TYALOs multicolour LED illumination will set the desktop alight in a blaze of colour, which, while not beaming gamers directly into the future, will immerse them in a cool light show.

“Every item of gaming kit needs to be fine-tuned to each other perfectly if you want to achieve maximum success. With the TYALO we’ve developed a deskset that allows anyone to start gaming at a high technical level and stop worrying about whether the mouse and keyboard will work together,” explained Rainer Nawratil, Director of Product Management, PR & Marketing at Speedlink.

“The deskset’s harmonious design and performance are based on our proven product ranges – giving newbs in particular the perfect set of tools to get started in the virtual world.”

The third product in the bundle is a mousepad. The bundled mouse will seem to just float across it thanks to the pad’s soft, extra-smooth fabric surface and non-skid backing, delivering unparalleled performance when gaming on the computer.

And to ensure gamers don’t lose sight of what’s going on in real life, the keyboard also features a handy smartphone holder. This enables them to keep an eye on things off-screen or watch the latest walk-through video to shift their game skills up a gear – certainly almost as good as any helping hand from the future.

TYALO Illuminated Gaming Deskset

- Article number: SL-670300-BK
- USB mouse, USB keyboard and mousepad set
- Multicolour LED lighting for mouse and keyboard
- Mouse: 5 ergonomically placed buttons and 2 DPI switches, optical sensor with adjustable resolution (1,200/1,600/2,400/3,200dpi), 1,000Hz polling rate, braided cable
