Enjoy truly untethered typing and swiping with Speedlink's new wireless desksets: the NIALA, NEOVA and NOBELA

Weertzen, 25 September 2019 – The electronics specialist Speedlink is adding three new desksets, the NIALA, NEOVA and NOBELA, to its extensive office lineup.

Top quality at a reasonable price – it's just got to be Speedlink for anyone who needs a new deskset for the daily office grind. Now the electronics specialist has launched not one, but three mouse-and-keyboard combos that make the brand even more indispensable than before.

And they've gone further still as the NIALA, NEOVA and NOBELA are much more than a simple deskset bundle. Each mouse feels great to hold and, just like the keyboard in every deskset, is completely cordless with no annoying cable. The desksets are perfect for a wide variety of applications, including use in large conference rooms thanks to the tetherless freedom offered by their maximum 8m range.

Speedlink's also thought about the real-life side of things, so for maximum practicality and no more risk of the USB receiver getting lost in the depths of the laptop bag, it stows away inside the mouse. The desksets don't need any additional drivers either, and are ready to use as soon as they're connected. They even come with batteries for both the mouse and the keyboard for action right out of the box.

The NIALA Deskset is the most inexpensive model of the three new desksets. Its three-button mouse is built to Speedlink's typical top quality and features an advanced 1,600dpi sensor. It also comes with a full-size keyboard, which is perfect for most office applications. Want more? The NEOVA Deskset is the perfect choice. Its mouse features an

adjustable sensor resolution of 800, 1,200 or 1,600dpi for total customisation to the task at hand. The keyboard is a joy to type on thanks to the concave waterdrop keycaps, and with its twelve multifunction keys it makes it a breeze to control core system features.

With its ultimate mix of stunning design, top build quality and many additional features, the ultra-premium NOBELA reigns supreme among Speedlink's new office desksets. The lower edge of the keyboard also features an incredibly comfortable wrist rest to relieve hand and wrist strain when typing away. And with 25 multifunction keys, the keyboard offers easier and faster access to an incredible array of programs and functions. The set's accompanying wireless five-button mouse has a stylish design that'll make an impact wherever it goes, plus it fits perfectly in the palm thanks to its incredibly ergonomic shape.

NIALA Deskset – Wireless

- Article number: SL-640306
