## **Gaming headset with stunning RGB illumination and vibration effects also immerses the eyes in the action**

**Weertzen, 27 February 2020 – Speedlink launches the QUYRE RGB 7.1 – a gaming headset that’s not just a treat for the ears.**

The QUYRE turns any action game into an experience not just for the ears, but for the eyes and all the other senses too as it lights up the room in an explosion of colour and its booming bass sends vibrations thundering through the ultra-soft ear pads. Following on from the ORIOS RGB 7.1 for pro-level esports use, Speedlink’s new gaming headset expands its multi-award winning headset lineup to include an additional model that now brings surround sound and stunning illumination from the RGB colour spectrum to PC gamers too. The QUYRE also comes kitted out with a thunderous vibration function, which can be deactivated, plus the headset takes ease of use to the next level with its left earcup controls. And for even greater customisation, gamers can fine-tune the sound via the powerful software for a highly calibrated experience that will blow away near enough all the senses.
