Make your voice heard when gaming: Speedlink's VOLITY READY is the perfect starter set for a streaming career

Weertzen, 27. June 2019: With the VOLITY READY, gaming accessories specialist Speedlink presents a streaming starter set that offers studio-quality sound at an affordable price.

Those who want to share their esports skills with their fans need to have the requisite gaming skills as well as professional equipment right from the get-go. Without a decent mic, even the most passionate stream will end up sounding like a dull, babbling commentary about the on-screen action. With the VOLITY READY Streaming Starter Set, Speedlink now brings to market the perfect set of kit for streaming in superior sound quality. It includes a high-quality microphone with cardioid polar pattern as well as a windshield and pop filter for clear voice transmission free of vocal plosives and breath blasts. The set offers plug & play convenience thanks to its USB-A connector and integrated sound chip, allowing users to hook it up and start streaming right away without even needing to have an expensive sound card. And with its flexible and adjustable microphone arm, the mic can be positioned exactly where it belongs – right in front of the streamer's mouth and away from the line of sight. In addition, a shock mount ensures the mic is isolated from vibration and held securely in place on the microphone arm.

“Unbox, assemble and stream like a pro – with the VOLITY READY Streaming Starter Set, for €129.99 we're offering a low-price entry point for any gamer, esports commentator or YouTuber who wants to ensure their streams reach viewers in professional quality,” explained Rainer

Nawratil, Director of Product Management, PR & Marketing at Speedlink.

If someone already has a microphone, Speedlink offers an inexpensive alternative to the all-you-need set that comprises just the accessories. The VOLITY Streaming Accessory Set features the same set of accessories as its big brother, just without the microphone. It includes the windscreen and pop filter, shock mount, swivel-mount microphone arm and desk clamp – and all for just €39.99. For users who want the world to hear what they've got to say, Speedlink has all the kit to ensure the audio stream reaches the community in top quality.
