

## **All the action, zero cable: the FORTUS Gaming Mouse from Speedlink combines maximum precision with incredible comfort and the convenience of wireless freedom**

**Weertzen, 18 July 2017: Whether shooter, MOBA or MMO – when things heat up on the screen, victory or defeat is ultimately dictated by mouse accuracy. The FORTUS Gaming Mouse delivers this, combining precision with comfort and convenience. It boasts a thumb recess for strain-free ergonomic comfort, and a rubberised surface for a great feel and the necessary grip – even when all hell breaks loose on the mousepad. Weighing in at 125g, the FORTUS Gaming Mouse delivers all this without being tied down by an annoying cable.**

It features robust 2.4GHz wireless technology for an operating range of up to six metres in any direction from the PC – with data transmitted within this zone at nano-second speeds for zero lag. The dpi switch lets the user adjust the optical sensor's sensitivity on the fly from 600 to 2400dpi, with the selected resolution visualised using four different atmospheric LED light effects. The mouse also includes ergonomically positioned side buttons, a non-slip scroll wheel and a nano receiver, which stows away inside the mouse, for the computer.

Just like other Speedlink gaming products the FORTUS Gaming Mouse comes in a shimmering matt red-black colour scheme, which is further enhanced by contrasting LED light effects.

For those who are fired up about getting a wireless gaming mouse but who want to have a matching gaming keyboard, the wait will soon be over as Speedlink will present a companion gaming keyboard by the end of gamescom in August.

### Technical specs:

- Wireless 5-button mouse
- LED illumination with four colours
- Ergonomic shape with thumb recess (for right-handers)
- 2.4GHz wireless technology for a range of up to 6m
