

More than just a trend: SPEEDLINK maintains focus on ergonomic products in North America

The new OBSIDIA mouse expands the company's ergonomic range

Weertzen/Las Vegas, January 4, 2016 – It's no secret people are spending an increasing amount of their professional and personal lives on the PC. So much time working on computers can cause wrist fatigue and painful irritation of the tendons. It's not uncommon for the wrong hardware to play a central role. Using an ergonomic mouse from SPEEDLINK could be the solution.

This is why SPEEDLINK has carried dedicated ergonomic products in its range for many years now. These include the MANEJO, which promotes a natural arm posture, thereby preventing injury. But as vertical mice aren't suitable for all customers, SPEEDLINK is releasing its new ergonomic mouse, the OBSIDIA, at CES 2017.

With its generous contact surface area, the OBSIDIA is big enough to support the entire hand – with its thumb recess providing additional grip. For right-handers, the special shape is comfortable to use without the hand feeling tired. Thanks to plug & play functionality, the mouse is ready to use right out of the box. The new OBSIDIA mouse will be available in February for an MSRP of US\$ 29.99 from Amazon, BEST BUY.com and Fry's.

Press Release
– For immediate release –
